

The Graduate Student Association Announces the

Annual Research Symposium

Thursday, October 27, 2016

This year's plenary talk will be given by Dr. Kent Hunter, a Senior Investigator in the Laboratory of Cancer Biology and Genetics at the NIH. Using innovative strategies and cutting edge technologies he has identified a number of genes that contribute to inherited susceptibility to tumor dissemination. Dr. Hunter continues to pioneer the use of integrated genetic and genomic technologies to gain better understanding of the genes and cellular pathways that contribute to the metastatic process. Recent efforts include incorporating the knowledge gained from the genetic studies with novel therapeutic compounds or strategies to try to reduce metastatic burden in breast cancer patients.

Registration: 9:00 AM -- 9:30 AM
Medical Science Building, Grand Foyer

Student Poster Sessions: 9:30 AM -- 12:30 PM

9:30 AM - 10:30 AM: Group 1

10:30 AM - 11:30 AM: Group 2

11:30 AM - 12:30 PM: Group 3

Medical Science Building, Grand Foyer

Refreshments will be served during the Poster Session

Lunch: 12:30 PM -- 1:30 PM
Medical Science Building, Grand Foyer

Plenary Talk: 1:30 PM -- 2:30 PM

**“Investigating the Etiology of Breast Cancer Metastasis
Through Genetic and Genomic Screens”**

School of Dental Medicine B-965

Student Oral Presentations: 2:30 PM -- 4:00 PM

School of Dental Medicine B-965
