eBeam® Quick Setup Guide

1. Turn on the projector
2. Turn on the computer
3. Connect the eBeam USB cable to your computer USB port
4. Connect the VGA port to your computer

5. Press e-Beam power button from the Console.

6. To calibrate, Press Calibrate button from the console. You will calibrate by clicking the stylus on the targets in the projected area showing on the whiteboard.

7. Push **Recording** button from your eBeam console to record audio and video in real time. This will save the file to your local computer. You can also use Camtasia relay or Camtasia studio.
