Abbreviated Breast MRI: Technical Principles, Patient Selection, and Clinical Implementation

Monday, February 23, 2026

12:00PM to 1:00PM

Hybrid / Virtual-Radiology Conference Room / WebEx

Faezeh Sodagari, MD

Assistant Professor of Radiology

Case Western Reserve University, School of Medicine

University Hospitals Cleveland Medical Center

Lecture Objectives:

- 1) Review diagnostic performance and clinical indications of abbreviated breast MRI compared with full diagnostic breast MRI and other breast cancer screening modalities.
- 2) Review technical principles and protocol optimization for performing abbreviated breast MRI.
- 3) Review key practical considerations for implementing abbreviated breast MRI in clinical practice, including patient selection, reporting, reimbursement, and integration into existing breast imaging workflows and screening programs.

Target Audience:

Radiologists, radiology trainees, MRI technologists, and members of the breast care team, including surgeons, medical oncologists, radiation oncologists, and advanced practice providers.

Disclosure Declarations:

Dr. Sodagari does not have a relevant financial relationship with commercial interests within the past 12 months.

Dr. Sodagari will not discuss unapproved/investigational uses of commercial products during her presentation.
