## **Pitfalls of Bowel Imaging on 'Routine' Emergency CT of the Abdomen and Pelvis**

Friday, June 7, 2024  
12:00PM to 1:00PM  
MSB B-610

**Douglas Katz, MD**  
Professor of Radiology, NYU Grossman Long Island School of Medicine

### **Lecture Objectives:**

- 1) To review a series of potential pitfalls which may be encountered when evaluating the bowel, from the esophagus to the distal colon, on 'routine' emergency CT of the abdomen and pelvis.
- 2) To demonstrate examples of these potential pitfalls on CT and how to recognize them.
- 3) To recognize true as well as false positive findings in the bowel on emergency CT.
- 4) To briefly review the relevant literature on these specific topics and how to optimize one's search as well as reporting and subsequent work up of potential findings in the bowel when not anticipated.

### **Target Audience:**

Radiology attendings, fellows, residents, technologists, emergency medicine and gastrointestinal medicine practitioners..

### **Disclosure Declarations:**

Dr. Katz does not have a relevant financial relationship with commercial interests within the past 12 months.  
Dr. Katz will not discuss unapproved/investigational uses of commercial products during his presentation.
