

## Core B- Specific Pathogen testing in our facility

Dirty bedding from sentinel rodents is tested by Charles Rivers diagnostic lab. They perform a serology prevalent panel and PCR testing for pinworms, furmites and Helicobacter. The panel screened for is:

### Prevalent Panel:

Minute Virus of Mice (MMV)

Mouse Parvovirus (MPV1-3 and generic NS1)

Mouse Hepatitis Virus (MHV)

Theiler's MeningoEncephalomyelitis Virus (TMEV)

Epizootic Diarrhea of Infant Mice (EDIM)

Mouse Norovirus (MNV) – not an agent that is excluded in facility
